- Dlizzios Post Processing for CS: <https://discord.com/invite/nkrQybAsyy>

*Installing this list while owning the full, paid AE is unsupported and done entirely at your own risk, however, during testing, at least one user with the full AE successfully installed the list by following these steps, so results may vary. If you own the paid AE upgrade, it is strongly recommended to back up the following folders before starting:*

*(Optional Backup)*

*C:\Users[name]\OneDrive\Documents\My Games*

*C:\Users[name]\AppData\Local\Skyrim Special Edition*

*C:\Games\Steam\steamapps\common\Skyrim Special Edition*

1. Uninstall Skyrim Special Edition from Steam.
2. Reinstall Skyrim Special Edition through Steam.
3. Right-clicked Skyrim game in Steam, selected Properties > DLC, and unchecked the Anniversary Upgrade.
4. Launched the game, let it run the automatic settings detection, and then clicked Play.
5. If you received a pop-up about downloading Anniversary content, exited the game using the console command: qq
6. Run Wabbajack.exe
7. Log in to your Nexus Mods account (Premium is highly recommended for automatic downloads).
8. Download KIMUT Modlist from Wabbajack
9. Set the Installation Location (where the game mods go) and Download Location (where temp files go). Do not use the same folder.
10. After downloading KIMUT Modlist, you need to download this Requirement:
  - Community Shaders AIO Jiaye "CS-Jiaye-Exp-26-01-20-RR.7z" (<https://discord.com/invite/nkrQybAsyy>)
  - Dlizzios Post Processing for CS "Dlizzio's Post Processing for CS.zip" (<https://discord.com/invite/nkrQybAsyy>)
11. Placed Community Shaders AIO Jiaye & Dlizzios Post Processing for CS files downloaded.rar into Mod Organizer 2
12. Enabled them.
13. launched the game using skse64\_loader.exe through Mod Organizer 2.
14. Press F12 while in-game for Community Shaders overlay and then go to post processing, choose "Kirby King profile" click Load.
15. Enjoy then.
